SECTION ONE: READING COMPREHENSION

(8 points)

Read the passage carefully then answer the questions.

The Space Race

- 1 Almost everyday we see something in the paper or on our TV screens about the latest exciting development in the space race. Photographs are regularly flashed to the earth from millions of miles away. They are seen as a visible proof of man's new achievements and successes.
- 2 We are often told that such achievements will be utilised to make life better on earth. But what has the space race done to relieve the suffering of the earth's starving millions?
- 3 The space race is just an extension of the race for power on earth. Only the wealthiest nations can compete and they do so in the name of pure scientific research. But in reality, all they are interested in is power and prestige.
- 4 Poverty, hunger, disease and war are man's greatest enemies and the world would be infinitely better if the powerful nations devoted half as much money and efforts to these problems as they do to the space race. For the first time in history, man has the overwhelming technological resources to combat human suffering, yet he spends them on meaningless pursuits.
- 5 If a man deprived himself and his family of food in order to buy a car, we would consider him mad. Individuals with limited budgets usually get their priorities right: they provide themselves with necessities before trying to obtain luxuries. Why can't great nations act in the same sensible way? Let us put our house in order first and let the space look after itself!

Answer the following questions according to the text.
